

CodeAlpha — Task 2

EDA Visual Appendix

Charts generated directly from books_scraped.csv

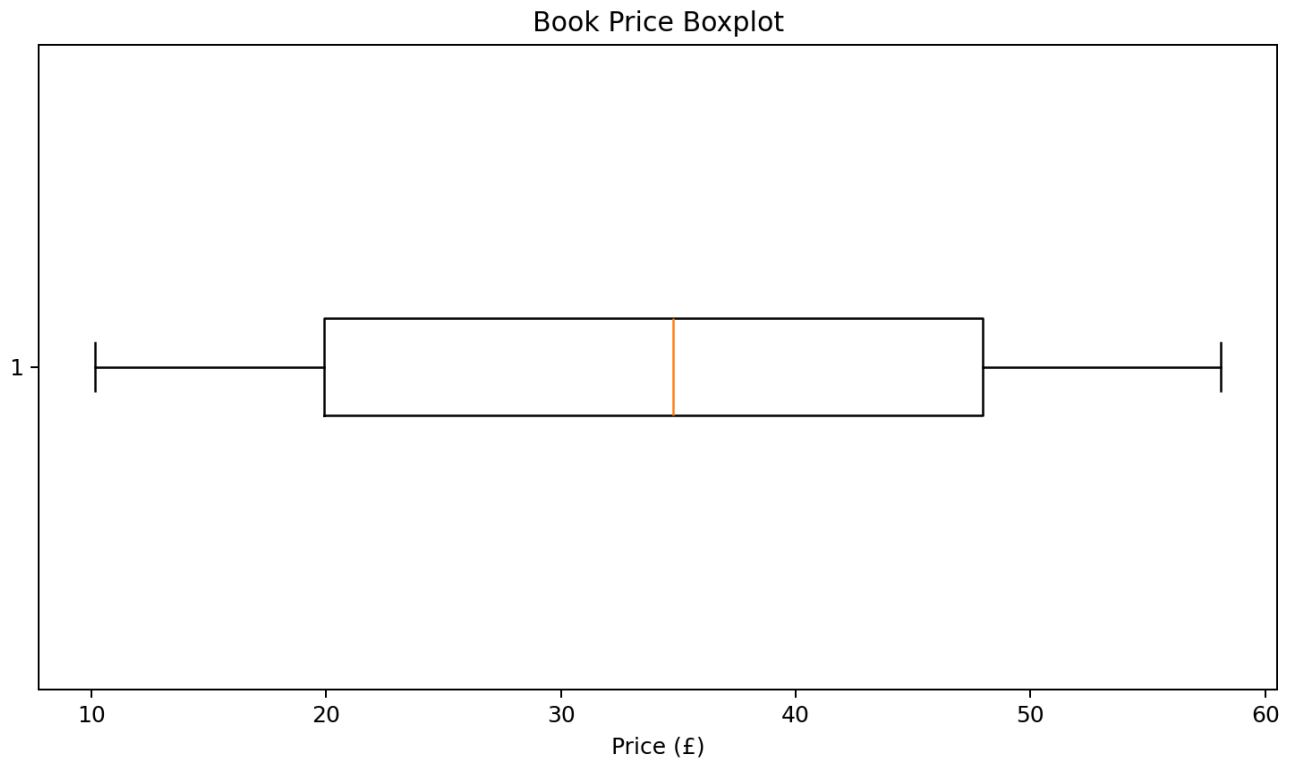

Dataset: 100 books | Price range: £10.16–£58.11 | Mean rating: 2.93/5

Figure 1 — Price Distribution

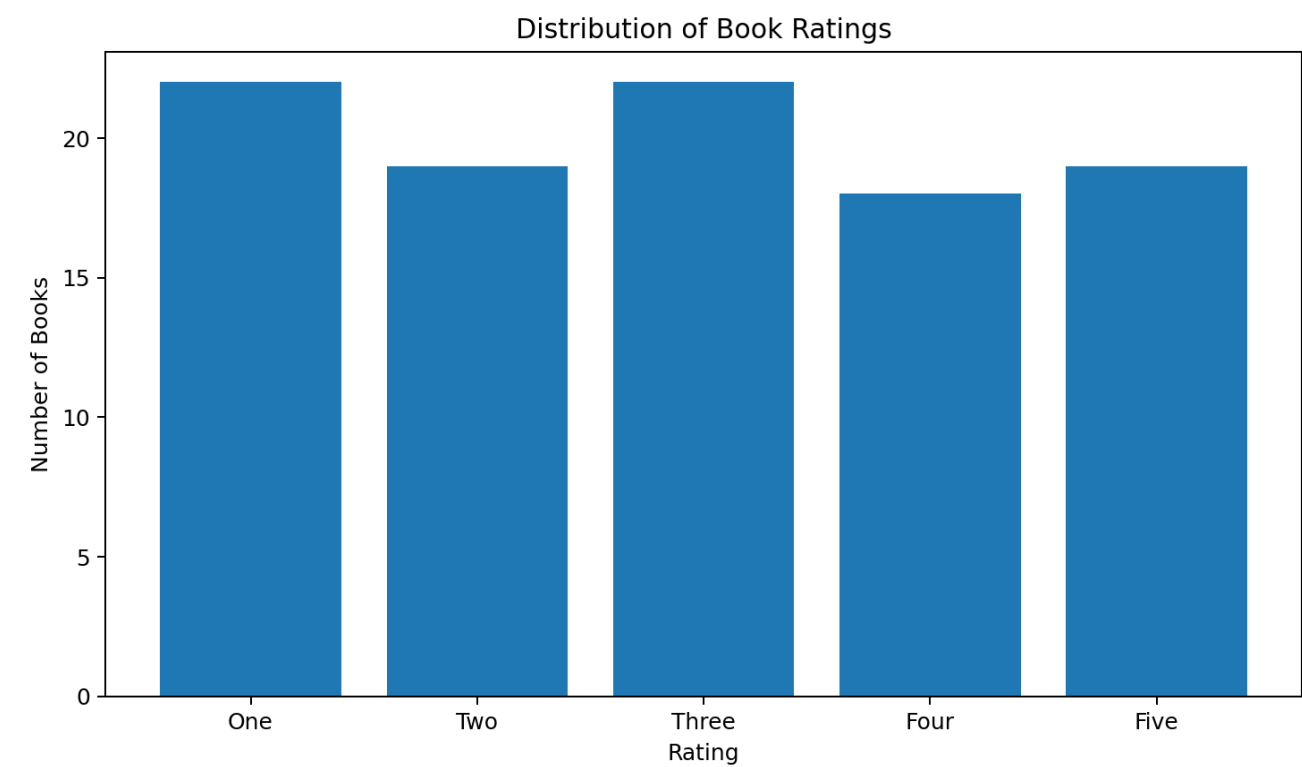

Interpretation: prices occupy a broad range with no single narrow price band dominating the sample.

Figure 2 — Price Outlier Review

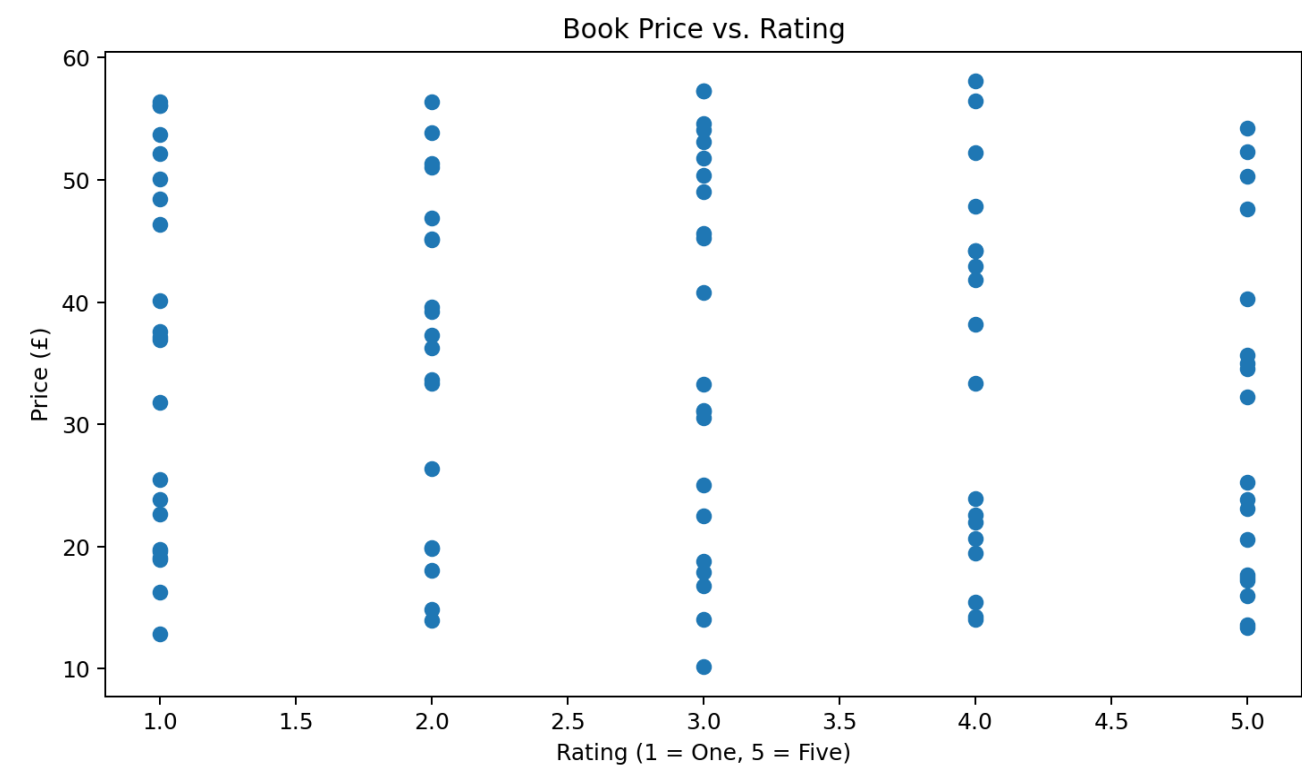

Interpretation: the $1.5 \times \text{IQR}$ method identifies 0 price outliers in the sample.

Figure 3 — Rating Distribution

Interpretation: all five rating levels are represented, with no extreme imbalance.

Figure 4 — Price vs. Rating

Interpretation: the Pearson correlation is -0.122, indicating a very weak negative linear relationship.

Figure 5 — Mean and Median Price by Rating

Interpretation: price does not increase consistently as rating increases; the five-star group has a comparatively lower mean price in this sample.
